

CME Group Education

Whether you're a seasoned trader or just getting started, CME Group's educational resources will help you build and refine your trading skills. Our faculty of industry experts provide in-person and online training for traders, associations and those learning about the industry.

CME Institute is a comprehensive online education center complete with courses on products and trading strategies for traders of all levels. It also hosts trading tools and simulated environments to help you practice your skills.

CLIENT TRAINING

Our team of industry experts offer bespoke training for firms, traders, industry partners and associations. We teach a wide range of topics, from general futures and options to more advanced product trading strategies and will create and customize any presentation to meet market demand.

ONLINE LEARNING

Learn at your own pace and find answers to your trading questions through our digital learning center, CME Institute. Available in multiple languages, these courses range from introductory level to advanced topics and are broken into segments to ensure you find exactly what you're looking for.

TOOLS and SIMULATION

On CME Institute, traders can access a variety of tools that help them practice their skills and refine their strategies. The simulator offers an embedded heat map, one-click trading, charts, indicators and more.

EVENTS and WEBINARS

Stay tuned to our events calendar as we roll out our class schedule and other interactive educational programming led by our expert faculty.

RESEARCH and ANALYSIS

Traders can deepen their understanding of the markets by following the latest research, commentary, analysis, economic events and news – and our newest program Traders Edge.

TRADING CHALLENGES

CME Group offers our customers a unique opportunity to customize trading challenges for their clients or internal staff. Choose your products, set challenge parameters, add your branding and dive into the ultimate learning tool.

Client Training

Our expert educators are able to present on a variety of topics. See below for a sampling of their presentations.
